INDEX TO VOLUME 31 1996

Index to Authors and Contributors

ADINARAYANA, N. *Paper* Elastoplastic stress and strain predictions for axisymmetric pressure vessel bodies under transient thermal loads, 81
ALWAR, R. S. *Paper* Elastoplastic stress and strain predictions for axisymmetric pressure vessel bodies under transient thermal loads, 81

BATISTA, M. *Technical note* Stresses in a circular ring under two forces acting along a diameter, 75
BELL, A. J. *Paper* Experimental study of circular flange joints in tubular structures, 259

CAO, J. J. *Paper* Experimental study of circular flange joints in tubular structures, 259
CHANDRASHEKHARA, K. *Paper* An experimental investigation into pile group–layered soil interaction, 371
COLGAN, D. *Papers* The effect of the transverse component of the hip reaction on cement mantle stresses in a model of an implanted Exeter™ prosthesis, 205. Three-dimensional embedded strain guage analysis of the effect of collared versus collarless prostheses on cement mantle stresses in a femoral model of a total hip replacement, 329
CRAINE, R. E. *Paper* Modelling creep failure in welded plates under uniaxial loading, 117

DULIEU-SMITH, J. M. *Paper* Devices for the experimental determination of individual stresses from thermoelastic data, 53
DUNNE, F. P. E. *Papers* Modelling the influence of filler particles on surface geometry in drawn PET film, 65. Mechanisms-based constitutive equations for the superplastic behaviour of a titanium alloy, 187

EDWARDS, L. *Paper* Measurement of the three-dimensional residual stress distribution around split-sleeve cold-expanded holes, 413
ELLIOTT, K. S. *Paper* Elastic–plastic strain distributions at fillet welds, 215
ERMAN, Z. *Paper* Three-dimensional design optimization using the boundary integral equation method, 289

FAURE, F. *Paper* Development and experimental validation of the deep hole method for residual stress measurement, 177
FENNER, R. T. *Papers* Three-dimensional design optimization using the boundary integral equation method, 289. Numerical study of some approaches to shape design sensitivity analysis using boundary elements, 361
FESSLER, H. *Paper* Elastic–plastic strain distributions at fillet welds, 215

GANAPATHY, V. *Paper* Phase-shifting methodologies in photoelastic analysis—the application of Jones calculus, 423
GERLACH, C. F. G. *Paper* Modelling the influence of filler particles on surface geometry in drawn PET film, 65
GRAY, T. G. F. *Paper* Analysis of stress concentration factors for stepped plates based on a crack tip stress intensity approach, 197

HARDY, S. J. *Papers* Elastic–plastic finite element analysis of short flat bars with projections. Part 1: shear loading, 9. Part 2: axial loading, 25. Part 3: combined axial and shear loading, 269. An assessment of the notch stress/strain conversion rules for short flat bars with projections subjected to axial and shear loading, 91
HAYHURST, D. R. *Paper* Creep constitutive equations for a 0.5Cr–0.5Mo–0.25V ferritic steel in the temperature range 600–675 °C, 299
HILLS, D. A. *Papers* The solution of cracks emanating from circular holes, 235. Stress intensity factors for cracks emanating from a semicircular notch in a half-plate, 433. *Technical note* The state of stress induced by a conical indenter, 325
HIROSHIMA, T. *Paper* Three-dimensional finite element analysis and strength evaluation of link chains in chain hoists subjected to impact loads, 43
HYDE, T. H. *Paper* Observations on the creep of two-material structures, 441

JONES, D. P. *Paper* Modelling the influence of filler particles on surface geometry in drawn PET film, 65
JOSEPH ANTONY, S. *Paper* An experimental investigation into pile group–layered soil interaction, 371

KIMMINS, S. T. *Paper* Creep deformation and rupture of low alloy ferritic weldments under shear loading, 125
KOČANDRLE, P. *Paper* Three-dimensional shape optimization approach based on natural design variables and the boundary element method, 377
KOŠKA, P. *Paper* Three-dimensional shape optimization approach based on natural design variables and the boundary element method, 377
KRAINCANIC, I. *Paper* Prediction of axial hysteresis in locked coil ropes, 341
KRISHNA IYER, P. *Paper* Three-dimensional photoelastic analysis of pile caps, 35
KRISHNAN, M. *Paper* A symmetric linear elastic model for helical wire strands under axisymmetric loads, 389

LEGGATT, R. H. *Paper* Development and experimental validation of the deep hole method for residual stress measurement, 177
LITTLE, E. G. *Papers* The effect of the transverse component of the hip reaction on cement mantle stresses in a model of an implanted Exeter™ prosthesis, 205. Three-dimensional embedded strain gauge analysis of the effect of collared versus collarless prostheses on cement mantle stresses in a femoral model of a total hip replacement, 329
LIN, S. *Papers* The solution of cracks emanating from circular holes, 235. Stress intensity factors for cracks emanating from a semicircular notch in a half-plate, 433
LIN, S. Y. *Paper* Hollow cylinder upsetting between flat platens considering unequal frictional conditions, 403

McTAGUE, D. *Paper* The effect of the transverse component of the hip reaction on cement mantle stresses in a model of an implanted Exeter™ prosthesis, 205. Three-dimensional embedded strain gauge analysis of the effect of collared versus collarless prostheses on cement mantle stresses in a femoral model of a total hip replacement, 329
MALLIKARJUNA REDDY. J. *Paper* An experimental investigation into pile group–layered soil interaction, 371
MEE, D. J. *Technical note* Dynamic strain measurement using piezoelectric polymer film, 463
MILLS, P. D. A. *Paper* Modelling the influence of filler particles on surface geometry in drawn PET film, 65
MOFFAT, D. G. *Papers* Response and cyclic strain accumulation of pressurized piping elbows under dynamic in-plane bending, 135. Response and cyclic strain accumulation of pressurized piping elbows under dynamic out-of-plane bending, 153
MOORTHY, M. B. K. *Paper* A symmetric linear elastic model for helical wire strands under axisymmetric loads, 389
MORETON, D. N. *Papers* Response and cyclic strain accumulation of pressurized piping elbows under dynamic in-plane bending, 135. Response and cyclic strain accumulation of pressurized piping elbows under dynamic out-of-plane bending, 153

NEWMAN, M. G. *Paper* Modelling creep failure in welded plates under uniaxial loading, 117
NISHITANI, T. *Technical note* Three-dimensional coupled thermal stresses in infinite plate subjected to a moving heat source, 243
NOWELL, D. *Paper* The solution of cracks emanating from circular holes, 235

O'DONNELL, P. *Papers* The effect of the transverse component of the hip reaction cement mantle stresses in a model of an implanted Exeter™ prosthesis, 205. Three-dimensional embedded strain gauge analysis of the effect of collared versus collarless prostheses on cement mantle stresses in a femoral model of a total hip replacement, 329
ÖZDEMIR, A. T. *Paper* Measurement of the three-dimensional residual stress distribution around split-sleeve cold-expanded holes, 413

PERRIN, I. J. *Paper* Creep constitutive equations for a 0.5Cr–0.5Mo–0.25V ferritic steel in the temperature range 600–675 °C, 299
PIPELZADEH, M. K. *Papers* Elastic–plastic finite element analysis of short flat bars with projections. Part 1: shear loading, 9. Part 2: axial loading, 25. Part 3: combined axial and shear loading, 269. An assessment of the notch stress/strain conversion rules for short flat bars with projections subject to axial and shear loading, 91

RAMESH, K. *Paper* Phase-shifting methodologies in photoelastic analysis—the application of Jones calculus, 423
RAOOF, M. *Paper* Prediction of axial hysteresis in locked coil ropes, 341

SACKFIELD, A. *Technical note* The state of stress induced by a conical indenter, 325
SAM, C. *Paper* Three-dimensional photoelastic analysis of pile caps, 35
SATHIKH, S. *Paper* A symmetric linear elastic model for helical wire strands under axisymmetric loads, 389
SAWA, T. *Paper* Three-dimensional finite element analysis and strength evaluation of link chains in chain hoists subjected to impact loads, 43
SHIMIZU, M. *Technical note* Three-dimensional coupled thermal stresses in infinite plate subjected to a moving heat source, 243
SMITH, A. L. *Technical note* Dynamic strain measurement using piezoelectric polymer film, 463
SMITH, D. J. *Papers* Creep deformation and rupture of low alloy ferritic weldments under shear loading, 125. Development and experimental validation of the deep hole method for residual stress measurement, 177
SMITH, S. D. *Paper* Development and experimental validation of the deep hole method for residual stress measurement, 177
SODEN, P. D. *Paper* Indentation of composite sandwich beams, 353
SOH, A.-K. *Paper* An improved method for determining contact stresses, 169
SOH, C.-K. *Paper* An improved method for determining contact stresses, 169
SPENCE, J. *Paper* Analysis of stress concentration factors for stepped plates based on a crack tip stress intensity approach, 197
STANLEY, P. *Paper* Devices for the experimental determination of individual stresses from thermoelastic data, 53
STEPHEN, N. G. *Paper* Saint-Venant's principle and the anti-plane elastic wedge, 231
SUN, W. *Paper* Observations on the creep of two-material structures, 441

TAFRESHI, A. *Paper* Effects of local departures from nominal dimensions on stresses in thin torispherical end closures, 315
TAI, K. *Paper* Numerical study of some approaches to shape design sensitivity analysis using boundary elements, 361
THORPE, T. E. *Paper* Effects of local departures from nominal dimensions on stresses in thin torispherical end closures, 315
TOURNERY. F. *Paper* Analysis of stress concentration factors for stepped plates based on a crack tip stress intensity approach, 197
TRUMAN, C. E. *Technical note* The state of stress induced by a conical indenter, 325
TSUJI, M. *Technical note* Three-dimensional coupled thermal stresses in infinite plate subjected to a moving heat source, 243

USENIK, J. *Technical note* Stresses in a circular ring under two forces acting along a diameter, 75

WALKER, N. S. *Paper* Creep deformation and rupture of low alloy ferritic weldments under shear loading, 125
WANG, P. J. *Paper* Saint-Venant's principle and the anti-plane elastic wedge, 231
WHEEL, M. A. *Paper* A geometrically versatile finite volume formulation for plane elastostatic stress analysis, 111

YAHIAOUI, K. *Papers* Response and cyclic strain accumulation of pressurized piping elbows under dynamic in-plane bending, 135. Response and cyclic strain accumulation of pressurized piping elbows under dynamic out-of-plane bending, 153
YEHIA, K. *Paper* Observations on the creep of two-material structures, 441

ZAHLAN, N. *Paper* Modelling the influence of filler particles on surface geometry in drawn PET film, 65
ZHOU, M. *Paper* Mechanisms-based constitutive equations for the superplastic behaviour of a titanium alloy, 187
ZHU, L. *Paper* Stress and strain analysis of plates subjected to transverse wedge impact, 1
ZUCCARELLO, B. *Paper* Optimization of depth increment distribution in the ring-core method, 251

Subject Index

A GEOMETRICALLY VERSATILE FINITE VOLUME FORMULATION FOR PLANE ELASTOSTATIC STRESS ANALYSIS, *Paper*, 111
Analysis:
  design sensitivity, 361
  elastic–plastic finite element, 9, 25, 269
  photoelastic, 423
  plane elastostatic stress, 111
  stress and strain, 1, 81
  stress concentration factors, 197
  three-dimensional embedded strain gauge, 329
  three-dimensional finite element, 43
  three-dimensional photoelastic, 35
ANALYSIS OF STRESS CONCENTRATION FACTORS FOR STEPPED PLATES BASED ON A CRACK TIP STRESS INTENSITY APPROACH, *Paper*, 197
AN ASSESSMENT OF THE NOTCH STRESS/STRAIN CONVERSION RULES FOR SHORT FLAT BARS WITH PROJECTIONS SUBJECTED TO AXIAL AND SHEAR LOADING, *Paper*, 91
AN EXPERIMENTAL INVESTIGATION INTO PILE GROUP–LAYERED SOIL INTERACTION, *Paper*, 371
AN IMPROVED METHOD FOR DETERMINING CONTACT STRESSES, *Paper*, 169
A SYMMETRIC LINEAR ELASTIC MODEL FOR HELICAL WIRE STRANDS UNDER AXISYMMETRIC LOADS, *Paper*, 389

Bars, short flat, 9, 25, 91, 269
Beams, composite sandwich, 353
Bending:
  in-plane, 135
  out-of-plane, 153
Bodies, axisymmetric pressure vessel, 81
Boundary elements, 361
  method, 377

Chains, link, 43
Conditions, unequal frictional, 403
Cracks, 235, 433
Crack tip stress intensity, 197
Creep, 441
  constitutive equations, 299
  deformation, 125
  failure, 117
CREEP CONSTITUTIVE EQUATIONS FOR A 0.5Cr–0.5Mo–0.25V FERRITIC STEEL IN THE TEMPERATURE RANGE 600–675 °C, *Paper*, 299
CREEP DEFORMATION AND RUPTURE OF LOW ALLOY FERRITIC WELDMENTS UNDER SHEAR LOADING, *Paper*, 125

Depth increment distribution, 251
DEVELOPMENT AND EXPERIMENTAL VALIDATION OF THE DEEP HOLE METHOD FOR RESIDUAL STRESS MEASUREMENT, *Paper*, 177
DEVICES FOR THE EXPERIMENTAL DETERMINATION OF INDIVIDUAL STRESSES FROM THERMOELASTIC DATA, *Paper*, *53*
DYNAMIC STRAIN MEASUREMENT USING PIEZOELECTRIC POLYMER FILM, *Technical note*, 463

EFFECTS OF LOCAL DEPARTURES FROM NOMINAL DIMENSIONS ON STRESSES IN THIN TORISPHERICAL END CLOSURES, *Paper*, 315
Elastic–plastic, 9, 25, 81, 215, 269
ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS OF SHORT FLAT BARS WITH PROJECTIONS. PART 1: SHEAR LOADING, *Paper*, 9
ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS OF SHORT FLAT BARS WITH PROJECTIONS. PART 2: AXIAL LOADING, *Paper*, 25
ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS OF SHORT FLAT BARS WITH PROJECTIONS. PART 3: COMBINED AXIAL AND SHEAR LOADING, *Paper*, 269
ELASTIC–PLASTIC STRAIN DISTRIBUTIONS AT FILLET WELDS, *Paper*, 215
ELASTOPLASTIC STRESS AND STRAIN PREDICTIONS FOR AXISYMMETRIC PRESSURE VESSEL BODIES UNDER TRANSIENT THERMAL LOADS, *Paper*, 81
End closures, thin torispherical, 315
Equations:
  boundary integral, 289
  constitutive, 187
  creep constitutive, 299
EXPERIMENTAL STUDY OF CIRCULAR FLANGE JOINTS IN TUBULAR STRUCTURES, *Paper*, 259

Film:
  PET, 65
  piezoelectric polymer, 463
Finite element analysis, 9, 25, 43, 269
Forces, 75
Formulation, finite volume, 111

Heat source, moving, 243
Hip, 205
  total replacement, 329
Hoists, chain, 43
Holes:
  circular, 235
  split-sleeve cold-expanded, 413
HOLLOW CYLINDER UPSETTING BETWEEN FLAT PLATENS CONSIDERING UNEQUAL FRICTIONAL CONDITIONS, *Paper*, 403
Hysteresis, axial, 341

Indentation, 353
INDENTATION OF COMPOSITE SANDWICH BEAMS, *Paper*, 353
Indenter, conical, 325
Intensity, crack tip stress, 197
Interaction, pile group–layered soil, 371
Impact, transverse wedge, 1

Joints, circular flange, 259
Jones calculus, 423

Loading:
  axial, 25
  axial and shear, 91, 269
  axisymmetric, 389
  impact, 43
  shear, 9, 125
  transient thermal, 81
  uniaxial, 117

MEASUREMENT OF THE THREE-DIMENSIONAL RESIDUAL STRESS DISTRIBUTION AROUND SPLIT-SLEEVE COLD-EXPANDED HOLES, *Paper*, 413
Measurement, residual stress, 177, 413
MECHANISMS-BASED CONSTITUTIVE EQUATIONS FOR THE SUPERPLASTIC BEHAVIOUR OF A TITANIUM ALLOY, *Paper*, 187
Method:
  boundary element, 377
  boundary integral equation, 289
  deep hole, 177
  ring-core, 251
Model:
  femoral, 329
  symmetric linear elastic, 389
MODELLING CREEP FAILURE IN WELDED PLATES UNDER UNIAXIAL LOADING, *Paper*, 117
MODELLING THE INFLUENCE OF FILLER PARTICLES ON SURFACE GEOMETRY IN DRAWN PET FILM, *Paper*, *65*

Notch, semicircular, 433

NUMERICAL STUDY OF SOME APPROACHES TO SHAPE DESIGN SENSITIVITY ANALYSIS USING BOUNDARY ELEMENTS, *Paper*, 361

OBSERVATIONS ON THE CREEP OF TWO-MATERIAL STRUCTURES, *Paper*, 441
Optimization:
  of depth increment distribution, 251
  three-dimensional design, 289
  three-dimensional shape, 377
OPTIMIZATION OF DEPTH INCREMENT DISTRIBUTION IN THE RING-CORE METHOD, *Paper*, 251

Particles, filler, 65
Phase shifting, 423
PHASE-SHIFTING METHODOLOGIES IN PHOTOELASTIC ANALYSIS—THE APPLICATION OF JONES CALCULUS, *Paper*, 423
Pile caps, 35
Piping elbows, 135, 153
Platens, flat, 403
Plates, 1
  half, 433
  infinite, 243
  stepped, 197
  welded, 117
PREDICTION OF AXIAL HYSTERESIS IN LOCKED COIL ROPES, *Paper*, 341
Projections, 9, 25, 91, 269
Prosthesis:
  collared, 329
  collarless, 329
  Exeter™, 205

RESPONSE AND CYCLIC STRAIN ACCUMULATION OF PRESSURIZED PIPING ELBOWS UNDER DYNAMIC IN-PLANE BENDING, *Paper*, 135
RESPONSE AND CYCLIC STRAIN ACCUMULATION OF PRESSURIZED PIPING ELBOWS UNDER DYNAMIC OUT-OF-PLANE BENDING, *Paper*, 153
Ring, circular, 75
Ropes, locked coil, 341

SAINT-VENANT'S PRINCIPLE AND THE ANTI-PLANE ELASTIC WEDGE, *Paper*, 231
Steel, 0.5Cr–0.5Mo–0.25V ferritic, 299
Strain, 1, 81, 91, 215
  cyclic, 135, 153
  dynamic, 463
Strands, helical wire, 389
Stress, 1, 53, 75, 81, 91, 315, 325
  cement mantle, 205, 329
  concentration factors, 197
  contact, 169
  intensity, crack tip, 197
  intensity factors, 433
  plane elastostatic, 111
  three-dimensional coupled thermal, 243
  three-dimensional residual, 413
STRESS AND STRAIN ANALYSIS OF PLATES SUBJECTED TO TRANSVERSE WEDGE IMPACT, *Paper*, 1
STRESSES IN A CIRCULAR RING UNDER TWO FORCES ACTING ALONG A DIAMETER, *Technical note*, 75
STRESS INTENSITY FACTORS FOR CRACKS EMANATING FROM A SEMICIRCULAR NOTCH IN A HALF-PLATE, *Paper*, 433
Structures:
  tubular, 259
  two-material, 441
Superplastic, 187
Surface geometry, 65

THE EFFECT OF THE TRANSVERSE COMPONENT OF THE HIP REACTION ON CEMENT MANTLE STRESSES IN A MODEL OF AN IMPLANTED EXETER™ PROSTHESIS, *Paper*, 205
Thermoelastic data, 53
THE SOLUTION OF CRACKS EMANATING FROM CIRCULAR HOLES, *Paper*, 235
THE STATE OF STRESS INDUCED BY A CONICAL INDENTER, *Technical note*, 325
THREE-DIMENSIONAL COUPLED THERMAL STRESSES IN INFINITE PLATE SUBJECTED TO A MOVING HEAT SOURCE, *Technical note*, 243
THREE-DIMENSIONAL DESIGN OPTIMIZATION USING THE BOUNDARY INTEGRAL EQUATION METHOD, *Paper*, 289
THREE-DIMENSIONAL EMBEDDED STRAIN GAUGE ANALYSIS OF THE EFFECT OF COLLARED VERSUS COLLARLESS PROSTHESES ON CEMENT MANTLE STRESSES IN A FEMORAL MODEL OF A TOTAL HIP REPLACEMENT, *Paper*, 329
THREE-DIMENSIONAL FINITE ELEMENT ANALYSIS AND STRENGTH EVALUATION OF LINK CHAINS IN CHAIN HOISTS SUBJECTED TO IMPACT LOADS, *Paper*, 43
THREE-DIMENSIONAL PHOTOELASTIC ANALYSIS OF PILE CAPS, *Paper*, 35
THREE-DIMENSIONAL SHAPE OPTIMIZATION APPROACH BASED ON NATURAL DESIGN VARIABLES AND THE BOUNDARY ELEMENT METHOD, *Paper*, 377
Titanium alloy, 187

Upsetting, hollow cylinder, 403

Variables, natural design, 377

Weldments:
  fillet, 215
  low alloy ferritic, 125
